Build Black Wealth via Social Change Platforms

GOAL: allow those suffering the most from failed systems to drive the building of new applications that are designed to drive social change and create generational wealth.

WE CAN BUILD A NON-PROFIT APPROACH TO BUILDING THESE NEXT-GENERATION PLATFORMS; ALL FOR COMMUNITY BENEFIT.

(1) Create a WA State non-profit to lead the effort:

BLACK LIVES LEAD
www.blackliveslead.org

"Creating new solutions that work for everyone; led by black lives."

The non-profit makes strong ties to community groups, politicians, city councils, etc. in the state. **The citizens will be the shareholders of the platforms we build for them.**

**(2)** Create a consortium of WA state non-profits; form strategic alliance.

(3) Non-profits provide requirements for core set of applications; create podcast, invite local participation.

(4) Obtain funding to build apps; via crowd sourcing or PubSec option*.
*See below for details.

(5) Apps are built, revenue paid to non-profits via blockchain (digital wallets); ownership via certificate stock tokens.

(6) All apps are packaged up and sold to each state as a PSBIP Portfolio Solution.

Wash - Rinse - Repeat: follow the same model across various states: create a state-based non-profit, build relationships, deploy apps and services so they are _100% right-fit for each community._

PSBIP = Public Sector Blockchain Infrastructure Program, and it incorporates all core applications built by the state deemed a critical part of its move towards a more transparent, accountable democracy.

Public Sector Blockchain Tax Investment Platforms

GOAL: to create a 100% taxation with representation government model that allows citizens to make investments into public works for social change; and earn revenue!

(1) Conduct a survey to find out what improvements people want to make.

PLACE IN ORDER OF IMPORTANCE THE PROJECT(S) YOU WOULD MOST WANT TO SUPPORT FOR BUILDING OUT:

Stack Rack	Project App Name	Link
1	Accountable Policing Platform	Project Intro
3	Election Reform App	Project Intro
6	Financial Reform App	Project Intro
7	Physical Health Data Marketplace	Project Intro
4	Prison Reform App	Project Intro
	----etc.----	

(2) The 'Project Intro' links will take you to a portal with detailed info on all efforts.

HERE YOU CAN:
- Sign up for a current project
- Submit an idea for a new project
- Track all projects
- Try out all new platforms / apps
- Own a piece of the new platform

(3) Citizens can join project groups, take an active role in buildout of the apps.

JOIN A PROJECT WITHIN THE 'RACI' STRUCTURE:

R = Responsible: leads the effort to drive the project.
A = Accountable: helps w/ finance, POC for its success.
C = Consult: provide reqmts to help build out platform.
I = Inform: play minimal role; informed of updates.

RACI Rules | Program Management Website

(4) Survey results determine what app to build first; place it on the ballot as a tax-based investment option for citizens.

ON THE BALLOT IS A YES/NO VOTE ON BUILDING A SOCIAL CHANGE PLATFORM; ALL 'YES' VOTERS BECOME OWNERS:

Tax Investment Level	Project App Name: Goal
A ◯ $0.125 per $1000 of your home value	The Accountable Policing Platform: to create greater accountability and transparency with the community as it relates to SPD's policing processes.
B ◉ $0.25 per $1000	
C ◯ $0.375 per $1000	

Project Details | Technology Overview
Your Rights | Ownership Agreement

[YES] [NO]

(5) All 'Yes' voters will be taxed at the level chosen; they'll receive ownership in the app (once built) via crypto-based assets.

OWNERSHIP DISTRIBUTION MODEL FOR FUNDED APPS:

$120 in taxes = 120 Certificate Stock Tokens in platform ownership.
DID* + Wallet

- CSTs are state-sponsored assets, tied to everyone's DID.
- Purchases of CSTs are possible post-election by everyone.
- Earn more CSTs each tax year, sell back to state at anytime.
- *DID = Digital Identity; given to all citizens. Read more here.

(6) All citizens can use, receive benefits from using the app. 'Yes' voters will earn funds from the sale of the app as it expands in use.

REVENUE DISTRIBUTION MODEL FOR FUNDED APPS:

App Earnings Breakdown:
- 50% for project costs
- 30% to new features
- 10% charitable efforts
- **10% revenue sharing**

DID + Wallet

- Manage CST assets, receive revenue in your digital wallet.
- Revenue distribution based on app ownership percentage.
