

TYMEBOXX: INITIAL PRODUCT OVERVIEW

Our first product will be one of fun and empowerment for today's young techy crowd:

Social Media Apps

Cross-Platform Messaging Apps

Dating Apps

TYMEBOXX

Consolidate all your social media, message app content into one file.

Import your content into a single environment for timeline viewing.

IMPORT FEATURES

RUN CHECKS

Content categorized, imported to a basic UI that allows the user to search for topics they address.¹

NOTE: We can fill the gap between what they say you can do with your data and what the law will allow!

CREATE FILE

Video & Audio Images

.MP4 .AVI .MOV .GIF .JPG

.WAV .MP3 .PNG .TIF

File Types: .TXT .HTML .XLS(X)
(for export) .CSV .XML²

2. Default format

HOST READY

3. BTC and ETH for now (programmable)

NOTE: this platform will be different from BlueSky but may have some overlapping elements / similarities.

DESIGN FEATURES

- Auto-import of your stuff into pre-designated content buckets
- Easy-to-use UI, editable elements
- Several page templates available
- Part of a modular Node.JS library (suite of tools for easy usability)
- System update logs (last modified)
- Admin UI (RBAC-based access rules); create group access, content sharing

100% responsive design; ability for cross-device movement in mid use.

RE-IMPORTS

- Checks for last imports
- Options to select latest content, or re-import everything (override)
- Scheduling of tasks, reminder notifications

1. Artificial Intelligence and Machine Learning services will be added to this process, to ensure real-time compliance.

THE GROWTH MODEL: 3 PHASES TO SUCCESS

We have a very specific growth strategy to take this technology national, then global:

1 MARKET PENETRATION + DID USE, EDUCATION

- Provide DID tech free
- Educate all consumers; videos, sample data sets
- Real-time updates (data privacy laws, processes)
- Gap analysis services in social media industry

RELATED EFFORTS:

- Make SaaS-ready alignments
- Create Phase 2 partnerships
- Introduce DID + custom rules tech to public sector officials

2 DID PROLIFERATION VIA DATA MARKETPLACES

$$\text{MY DATA} = \text{MY IP}^*$$

- Introduce concepts of data self-monetization
- Make deals with groups; build data marketplaces
- Show how to incorporate custom data mgmt. rules
- Empower consumers to own their IP / creativity

RELATED EFFORTS:

- Align with several politicians
- Introduce DID + custom rules tech to public sector officials

3 BUILDOUT OF SOCIAL CHANGE PLATFORMS

- Build apps: Accountable Policing Platform, others
- Stand up tax investment service for each state
- Turn democracy into a product: for reparations
- Build best-practice uses in public, private sectors

RELATED EFFORTS:

- Partnerships with HBCUs
- Provide tech, research to federal groups: the benefits

*Intellectual Property (creations of the mind that can be legally protected: inventions, designs, names, etc.)
