"WHAT COOL STUFF CAN WE DO WITH THIS TECHNOLOGY?"

We plan to build several value-add services that will empower young people of color in this new decentralized world:

CREATE BEATS

BM9000:
THE ULTIMATE
FREE BEATS
MACHINE

Use this free online service to start flipping beats and explore your creativity instantly; then save it to your DID and tokenize it for monetization - no downloads required. Try it out: www.basemoney.io

WEB3 + FINANCIAL LITERACY

How can we build Black Wealth?
 How do I monetize my creativity?
 What is RWA* tokenization?
 How can I become my own bank?

*Real World Assets

AI-driven, profile-specific custom content delivery.

USE DECENTRALIZED AI

The true benefits of AI, in terms of its transparency, security and collaboration, lies in its **decentralization**. Imagine an AI that helps with personalized education. Students could for example earn tokens to share their learning data, which would be securely stored in a decentralized manner. These tokens could then be used to access premium educational content or other services, creating a self-sustaining ecosystem! Read [this article from ArcBlock](#) to learn more about DeAI.

BUILD APPS

Our planned Web3 'Creator Economy' social media app.

The decentralized services of our implementation partner, ArcBlock, will allow us to offer several empowerment services to young creators, allowing them full control of their content.

Creator Studio
All-in-one creator tool

DID Spaces
Secure personal storage

NFT Studio
Mint and manage NFTs

Blocklet Launcher
One-click app launcher

AIGNE
